

Project Performance Test

Date	05-7-2026
Team ID	SWTID-2026-8108
Project Name	Heart Disease Analysis
Maximum Marks	

Model Performance Testing:

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	4,416 rows successfully loaded. 

2.

Data Preprocessing

Technical database columns cleaned and verified.
Applied clear natural language renaming across primary clinical variables

• Heart Disease as Heart Disease Status

• Alcohol Drinking as Alcohol Consumption

• Diff Walking as Difficulty Walking

• Age Category as Age Group

• Gen Health as General Health Rating

• Sleep Time as Sleep Duration (Hours)

• PhysicalActivity as Physical Activity

NameHeart_new2.csv

Description

No description available.

Fields

Type	Field Name	Physical Table	Remo...
Abc	Heart Disease Status	Heart_new2.csv	HeartD...
#	BMI	Heart_new2.csv	BMI
Abc	Smoking	Heart_new2.csv	Smoking
Abc	Alcohol Consumption	Heart_new2.csv	Alcohol...
Abc	Stroke	Heart_new2.csv	Stroke
#	Physical Health	Heart_new2.csv	Physic...
#	Mental Health	Heart_new2.csv	Mental...
Abc	Difficulty Walking	Heart_new2.csv	DiffWal...
Abc	Sex	Heart_new2.csv	Sex
Abc	Age Group	Heart_new2.csv	AgeCat...
Abc	Race	Heart_new2.csv	Race
Abc	Diabetic	Heart_new2.csv	Diabetic

3. Utilization of Filters

Interactive 1-click filters implemented: Heart disease status, Smoking Status, and Geographic Region Code.

4.	Calculation fields Used	Custom logical functions created to segment continuous data into clinical brackets (e.g., categorizing raw BMI integers into Underweight, Normal, Overweight, and Obese health categories) Drop field here Base Case (Numeric) × IF [Heart Disease Status] = "Yes" THEN 1 ELSE 0 END The calculation is valid. Apply OK here Add data to visual Drop field here BMI Category × IF [BMI] < 18.5 THEN "Underweight" ELSEIF [BMI] >= 18.5 AND [BMI] < 25.0 THEN "Normal Weight" ELSEIF [BMI] >= 25.0 AND [BMI] < 30.0 THEN "Overweight" ELSE "Obese" END The calculation is valid. Apply OK here Add data to visu Drop field here High Risk Lifestyle Flag × IF [Smoking] = "Yes" AND [Alcohol Consumption] = "Yes" THEN "High Risk" ELSEIF [Smoking] = "Yes" OR [Alcohol Consumption] = "Yes" THEN "Moderate Risk" ELSE "Lower Risk (Neither)" END The calculation is valid. Apply OK here Add data to visual
----	-------------------------	--

5. Dashboard design

No of Visual Includes specialized analytic components custom-built for Dr. Sharma, Ramesh, and Anita.

No of Visualizations / Graphs -Arranged into sequential tabs tracking demographic risk distributions across the entire patient cohort
